

"New Horizons Await: The Pinnacle School Embarks on a Fresh Journey"

The Pinnacle School is buzzing with excitement as it welcomes students to the new academic session. With a plethora of activities lined up, students are eager to dive in and make the most of their time. The School is gearing up to unveil a new look, promising an enhanced learning experience. Students are enthusiastically participating in various events, showcasing their talents and skills. As the session progresses, the school aims to foster a culture of innovation, creativity and excellence.

With a renewed focus on academic and extracurricular pursuits, The Pinnacle School is poised to reach new heights. The new session promises to be an exciting journey of growth and discovery for all.

All about last Summer

Last year in the month of June, my mother, father, brother and I went for our first trip to a hill station. We decided to go to Mussorie as it was the nearest hill station which could be reached by car.

We started at 6:00 AM and reached our holiday destination at 12:00 PM. It was a six hour journey. We stopped at two restaurants and had parathas and pakodas. During the travel, we saw beautiful snow-covered mountains and we could see many houses built on the mountains.

We traveled on spiral roads built on the mountains. We reached our hotel after a long and tiring journey, which was located on a mountain.

The hotel was very beautiful. It had everything: a fridge, a kitchen, a living room, a bedroom, and a TV.

The bedroom had a huge window with a beautiful mountain view. Since we were tired, we rested for an hour and then we visited a nearby park known as Company Park. It had many swings, slides, a museum, boating and many more adventurous things. Then we went back to the hotel to sleep as it had started becoming dark.

At night it was very cold and we had to turn off the fans and wear cover with blankets. It was very quiet.

On the second day, we went to Kempty Falls. It was a very beautiful and big waterfall. I tried to go in the water, but it was freezing cold.

We visited many other beautiful places and stayed there for two days.

On the third day, we set off for home. While returning, we visited another beautiful waterfall known as Bhatta Falls.

There was a restaurant by the falls where we sat and enjoyed Maggie.

The water level reached our ankles. While returning, we stopped for 2 hours in Dehradun and visited a zoo. It was a small zoo where we saw many birds and animals.

We stopped at Rajaji Dhaba to have lunch and reached back home in the night. It was my first memorable fun-filled trip to a hill station.

Why Exams Should Not Decide a Student's Future

Exams have been part of a student's life for as long as we can remember. Every few months, students are judged based on how much they can remember and write in 2-3 hours. But, is that fair?

Not every student is the same. Some are good at math, others shine in art, music, dance or sports. Some students understand topics deeply but cannot express them under pressure.

Yet, exams often focus only on memory and speed — not real learning or talent. Also, let's be real — exams create pressure. Students stay up late, skip meals, feel anxious and sometimes even fall sick because of exam stress. One silly mistake, one bad day, and boom — your marks drop and people start judging.

Is it fair to decide a student's whole future based on one exam? There are also students who are brilliant but slow writers. Or those who understand concepts well but freeze during exams due to nervousness. Should they be considered weak? Of course not. But our system doesn't think that way.

The truth is: marks are just numbers. They can never measure creativity, leadership, kindness, or problem-solving skills — which matter a lot in real life. Some of the most successful people didn't top their exams, but they believed in themselves and followed their passion.

It's time to move beyond this old-school thinking. Yes, exams can check what we've learned, but they shouldn't decide our worth or future. A better system would include projects, group work, real-world problem-solving and most importantly, the freedom to explore our own talents. In conclusion, exams can be one way to test knowledge — but they should never be the only way to judge a student. Everyone has potential. We just need a system that lets students show it in their own way.

TECHNO BLADE NEVER DIES

Techno Blade or Alexander was a beloved Minecraft YouTube Content Creator known for his unmatched PVP (Player vs Player) skills, and sense of humor. He inspired millions of fans around the Earth. His life was tragically cut by cancer. He is remembered by his community as he made a positive impact on the world through his video. Techno Blade was born on 1st June 1999.

He grew up in California and was homeschooled from middle to high school. While he was homeschooled, he began uploading videos of Minecraft on YouTube. In his earlier videos he uploaded Minecraft Monday, Bedwars and Sky wars. He was calm, strategic and precise in combat situations. He grew older and he started refining his editing, commentary, jokes and his gameplay.

Soon he got invited to Dream SMP (A roleplay Minecraft server with many popular youtubers including Dream, Wilbur Scott). He started using a dialogue 'Techno Blade Never Dies' as a joke but it became a symbol of strength and courage for his fans.

He passed away in August 2021. He told his fans that he had cancer. His father shared a goodbye message in the video 'So long nerds' and passed away at the age of 23.

ऑनलाइन कक्षाएँ

आज विज्ञान की कृपा से मनुष्य की जीवनशैली बहुत बदल गई है। हम अपने पूर्वजों की तुलना में सुविधाजनक जीवन जी रहे है। जैसे कहा जाता है कि शिक्षा कभी न रूकने वाली प्रक्रिया है। अब वर्षा हो या धूप , महामारी हो या प्रदूषण छात्रों की पढ़ाई सदा चलती रहती है। भले अध्यापकों को ऑनलाइन कक्षाएँ क्यों न लेनी पड़े। एक छात्र होने के नाते मेरा यह विचार है ऑनलाइन कक्षाएँ वक्त के साथ एक समझौता है । यह कक्षाएँ हमारी पारम्परिक कक्षाओं की जगह नहीं ले सकती। पढ़ाई का वास्तविक आनन्द तों मित्रों के साथ है,एक दूसरे का खाना खाने में है परन्तु ऑनलाइन कक्षा में यह सब तो जैसे खो जाता है। सबसे ज्यादा तो स्कूल के मैदान की सुखद हरियाली याद आती है। करोना काल के बाद जब हम पूरे दो साल बाद स्कूल आए तो ऐसा लगा मानो मुँह माँगी मुराद मिल गई हो। बच्चों का स्वभाव है कि वह जंगल में भी मंगल मना लेते है तो हमने भी अपनी ऑनलाइन कक्षा में मैज मस्ती करते हुए पढ़ाई की और कभी कभी तो अध्यापकों की डाँट भी खाई। असली सुख तो वापिस स्कूल में आकर मिला।

मोबाइल फोन और विद्यार्थी

आज मोबाइल फोन सभी की ज़िंदगी का एक महत्वपूर्ण हिस्सा बन गया है। मोबाइल ने हर क्षेत्र में क्रांति ला दी है। अपने विभिन्न इस्तेमाल के कारण मोबाइल फोन काफ़ी प्रचलित हो चुका है। समाज का हर वर्ग अपनी-अपनी आवश्यकतानुसार इससे लाभ उठा रहा है। विद्यार्थी वर्ग भी इससे अछूता नहीं है। स्कूल, कॉलेज, विश्वविद्यालय हर स्तर के विद्यार्थी की पहली पसंद मोबाइल बन चुका है। आज विद्यार्थी मोबाइल पर इंटरनेट की मदद से कहीं भी बैठे वांछित सामग्री को डाउनलोड करके और उसका प्रिन्ट लेकर अपनी पढ़ाई को गति प्रदान कर रहा है। इसके अतिरिक्त देश-विदेश के विभिन्न कॉलेजों में प्रवेश, प्रतियोगिताओं, परीक्षा परिणामों, नौकरी आदि से संबंधित भरपूर जानकारी वह इसी से एकत्रित करता है, किंतु विद्यार्थियों का एक वर्ग ऐसा भी है जो इसका दुरुपयोग करता है।

ऐसे विद्यार्थी आपस में घंटों बेकार में गप्पे हाँकने, ज़रूरत से ज्यादा मैसेज भेजने, वीडियो गेम्स खेलने, चित्र खींचने और नये-नये मोबाइल खरीदने में अपना समय बर्बाद करता है। अतः ऐसे विद्यार्थी को इसकी उपयोगिता समझनी चाहिए और इसका दुरुपयोग नहीं करना चाहिए।
